

Accessing the Medical History Survey

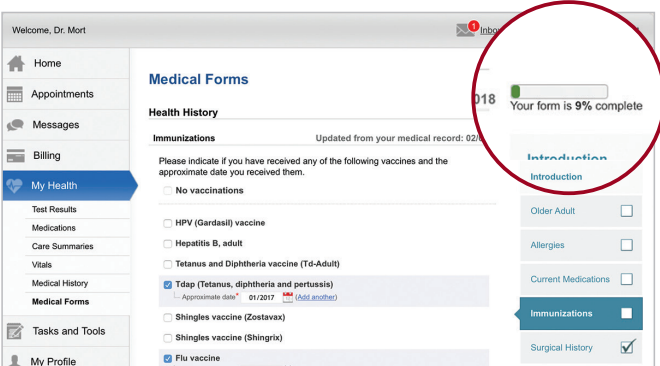

Welcome to PartnerMD. Follow these steps to access the medical history survey in the patient portal. Please fill out the survey prior to your first appointment.

You will receive a confirmation email prior to your appointment. **Click the button to confirm.** This will take you to the **Patient Portal log-in.** You will see a check mark with a message verifying that we've received your appointment confirmation response.

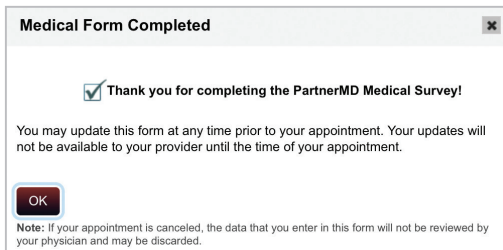

Once you have logged in, on the home page, you will see your upcoming appointment. Click the link below this information: **Complete PartnerMD Medical Survey.**

Clicking the link opens the medical survey instructions page and starts the survey. You do not need to complete the survey all at one time, however, **please complete the entire survey prior to your appointment.** You can complete several sections and return later to finish if you need more time. You will be able to see how much of the survey is complete from the Upcoming Appointments page as well as from the medical survey itself.

Please note, if your appointment is canceled, the information you have provided cannot be preserved in our system.

As each section of the health survey is completed, click **Save** and a check mark will appear on the section name. The percent complete updates as each section is completed.

After the last section is completed and the **Save** button is clicked, you will see the **Medical Form Completed** pop-up box.

If you have any trouble accessing the survey contact your Practice Manager for assistance.
